Step 1 — Back Cover

- Use the plastic opening tool to separate the back cover from the tablet. Carefully use the tool to pry open the sides, going around the entire tablet to lift the sides up.
- Once all sides have been pried up, pull the cover off and place it to the side.

Step 2 — Battery

- Cut the battery connectors one by one using wire cutters.
 - ⚠ Do not cut all the wires at the same time; you risk blowing up the battery or destroying the motherboard!
- After disconnecting the battery, take the new battery and use wire connectors to connect to the motherboard.
- ① You may use a soldering tool to disconnect the wires from the motherboard, and to also soldering the wires for the replacement battery onto the motherboard.

To reassemble your device, follow these instructions in reverse order.
